

A wireframe diagram of a mobile application interface. The interface is contained within a rounded rectangle with a light gray border. At the top, there are four small circles representing status bar icons. The layout consists of several sections: a header section at the top containing a logo box on the left and a title box on the right; a main section below the header, divided into a left column labeled 'MAIN' and a right column containing a 'MENU' box; a large 'HORAIRES' section below the main section; a thin horizontal bar below 'HORAIRES'; a large 'HONORAIRES' section below the thin bar; another thin horizontal bar below 'HONORAIRES'; a 'FOOTER' section below that; and a 'MENU 1.2' section at the very bottom. A home indicator bar is located at the bottom center of the screen.
